

DINCEL STRUCTURAL WALLING

For a building of Type A or B construction, C2D10 (1) specifies that elements of external walls, including their components, must be non-combustible.

The Dincel-Rockcote Coating System

| SUBSTRATE | BASE COATS | | TEXTURE | PROTECTION | |
|---|---|---|---|---|---|
| DINCEL STRUCTURAL WALLING | ROCKCOTE HIGH ADHESION PRIMER | ROCKCOTE QUICK RENDER NON-COMBUSTIBLE WITH ROCKCOTE MESH | ROCKCOTE TUSCANY | ROCKCOTE MASONRY PRIMER** | 2X ROCKCOTE ARMOUR OR ARMOUR FLEX |
|  |  |  |  |  |  |
| | STEP 1 | STEP 2 | STEP 3 | STEP 4 | STEP 5 |

A Rockcote specification for a Dincel Structural Walling system includes detailed step-by-step instructions from preparation of the Dincel substrate to the final finished coat.

*Rockcote mesh 4x5mm / 160gsm. This product is certified as non-combustible passing NATA accredited testing for AS1530.1.

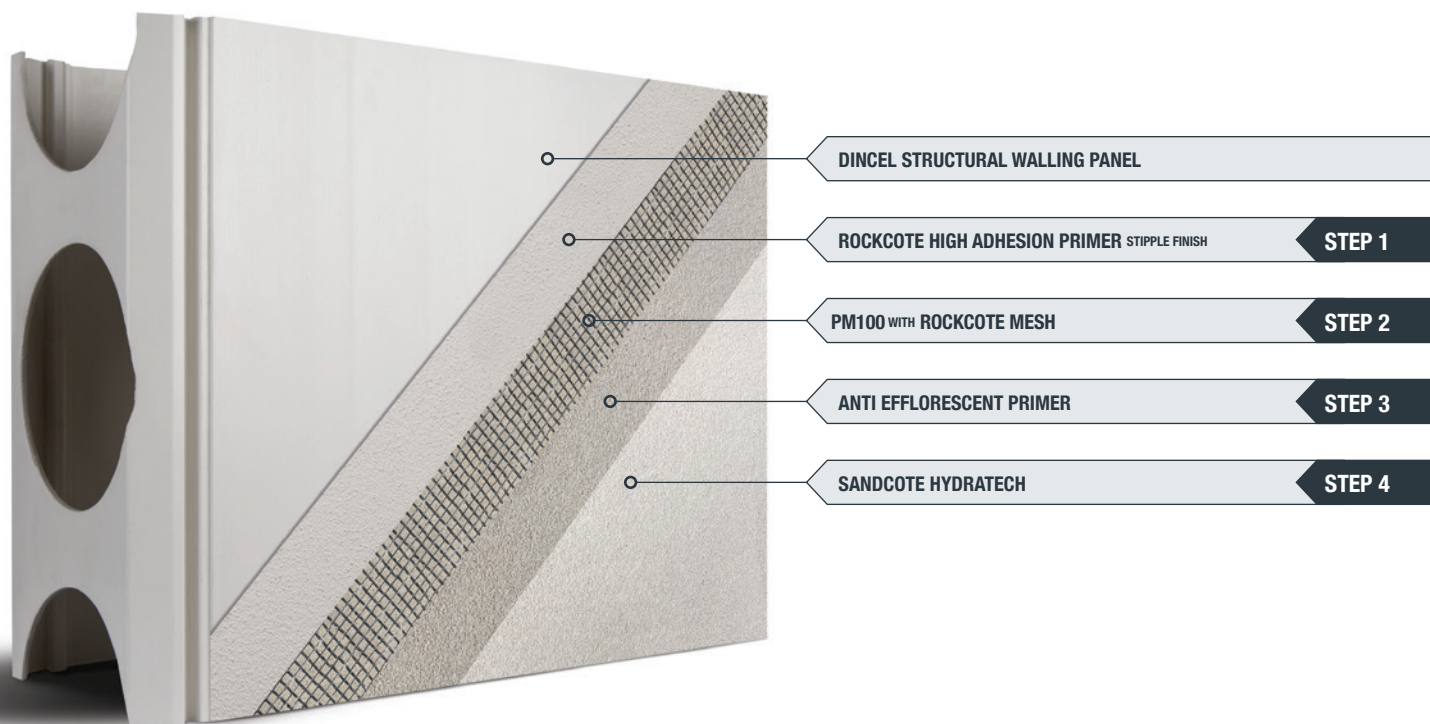

** Masonry Primer Hi Op is recommended on large broad wall areas to ensure uniform coverage and colour consistency.

BCA Combustibility Compliance

Rockcote products Deemed-to-Satisfy solution for buildings of Type A and Type B construction by non-combustible external walls (C2D10) and exempt elements: (C2D10)(4)(o) under the National Construction Code, Volume One.
