ROCKCOTE
QUICK RENDER

NON-COMBUSTIBLE

AS 1530.1 COMPLIANT

NCC requirements for external walls to be non-combustible.

For a building of Type A or B construction, C2D10(1)(a) specifies that elements of external walls, including their components, must be non-combustible.

Components of external walls include façade coverings (e.g. render and external cladding).

Types of Construction

Rise in storeys	Class of building 2, 3 and 9	Class of building 5, 6, 7, 8
4 or more	A	A
3	A	B
2	B	C
1	C	C

How does Rockcote stack up?

Rockcote has developed a comprehensive range of non-combustible renders designed to meet the highest safety and performance standards, required by the NCC. All renders have been independently tested and certified by a NATA accredited authority and are fully compliant with AS1530.1 combustibility requirements.

Rockcote Quick Render
High Build Non-Combustible

What about the other Rockcote products?

The NCC recognises that not all products can be non-combustible due to their required performance attributes. The following Rockcote products fall in the exempt category under the National Construction Code Volume One: C2D10: (4) (o): A paint, lacquer or a similar finish or coating.

BONDING AGENTS & PRIMERS

High Adhesion Primer
