

ROCKCOTE Reinforced Render System

1 NRG Greenboard

2 ROCKCOTE Mesh

3 ROCKCOTE Quick Render PM100

4 ROCKCOTE Acrylic Texture

5 ROCKCOTE Armour

6 ROCKCOTE Armour

One System, a Host of Benefits!

ROCKCOTE Reinforced Render (RRR) System is a screeded reinforced render with an acrylic finish suitable for installation over NRG Greenboard cladding. These systems can be fitted over standard timber and steel stud walls, providing a genuinely seamless rendered finish in a wide range of colours to suit your choice.

The NRG Greenboard is also suitable for use over concrete or masonry walls where they provide an insulating barrier, allowing the thermal mass of the masonry to help moderate indoor temperatures.

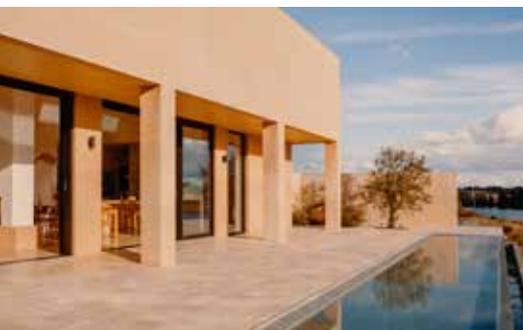

The RRR System can also be installed and finished by just one contractor.

The RRR System offers the following advantages:

- BAL29 (follow system)
- Codemark
- Lower embodied energy plus excellent insulation qualities
- Cost effective
- Long life, low maintenance finish
- Long term durability
- Design freedom and flexibility
- Wide range of texture finishes and colours
- Outstanding weather protection; water repellent & vapour permeable

The use of NRG Greenboard ensures continuous thermal insulation without thermal bridging.

System Overview

NRG Greenboard™ Insulated Wall Panel is a lightweight, energy efficient product, and once coated, the system provides a weather resistant, seam free rendered finish. NRG Greenboard™ insulated core of high density expanded polystyrene, positions the NRG Greenboard™ cladding insulation options from 1.92 R to 3.96 R.

NRG Greenboard™ Wall System

40mm - 50mm - 75mm - 100mm NRG Panel
